Nextlink announces distribution partnership with Xentris, LLC in the US for its range of consumer headsets

- Nextlink today announces that the company has entered into a distribution agreement with Xentris, LLC to offer its complete line of INVISIO® Bluetooth® headsets to the North American market. The INVISIO® brand is renowned for delivering cutting edge Bluetooth headsets, including the INVISIO® G5 and INVISIO® Q7.
- Nextlink has received opening orders on INVISIO® G5 and INVISIO® Q7 from Xentris
- Nextlink's new consumer headset INVISIO® Q7 was recently selected as "Best of CES Cell phone Accessory" by LAPTOP Magazine
- INVISIO® Q7 was also selected as finalist in "Best of CES" by CNET in the category "Cellphones and Smartphones"
- The INVISIO® Q7 and INVISIO® G5 were also given an "Innovation Honouree Award" when it was first announced at CES in 2007.

"We are very excited about working with the Xentris team in North America," said Gary Menees, Vice President of Sales for the Americas. "Their expertise in partnering with a wide range of channels, from key retailers to national carriers, will allow the INVISIO product line to reach a broader range of consumers."

About INVISIO® Q7:

The INVISIO® Q7 from Nextlink is the company's first consumer Bluetooth® headset to feature its patented Bone Conduction Technology, which was developed for demanding professionals in the military Special Forces.

Nextlink's Bone Conduction Technology ensures clear communication with a microphone that is integrated as part of the headset. Once the headset is in the ear, the microphone picks up vibrations transmitted through the jaw bone.

Because the vibrations don't pass through the air, ambient noise is effectively eliminated, allowing the user to communicate in noisy environments. It also means that the INVISIO® Q7 can pick up whispered conversations in quiet environments.

Nextlink's technology is combined with proven digital signal processing for noise and echo cancellation to give the clearest communication yet with a Bluetooth® headset.

About INVISIO® G5

Weighing only 5.85 grams, the INVISIO® G5 is the smallest Bluetooth headset on the market. The G5 boasts 20 hours of talk time and 30 days of standby time, and comes equipped with a protective charging case that allows users to charge their headset while on the go.
